

**National Interagency Coordination Center
Incident Management Situation Report
Friday, January 22, 2015 – 0800 MT
National Preparedness Level 1**

National Fire Activity (Jan. 15 – Jan. 21)

Initial attack activity: Light (78 new fires)
 New large incidents: 1
 Large fires contained: 1
 Uncontained large fires:** 0
 Area Command Teams Committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 0
 **Uncontained large fires include only fires being managed under a full suppression strategy.

Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

Predictive Services Discussion: A major winter storm will move through the eastern U.S. over the weekend, bringing a mix of weather from heavy rain in the southeastern states to a wintry mix in the mid-Atlantic and heavy snow and blizzard conditions across the Appalachians and the Eastern Shores. A Pacific storm will move into the West, bringing rain to much of the coast and lower elevations and snow to the mountains. Early in the week, conditions will dry in the East as the weekend storm exits and in the West as the Pacific storm moves over the Plains and the Midwest. Scattered rain and snow develop late week in the East with another cold frontal passage. Another Pacific storm enters the West.

REFUSING RISK

Operational Engagement Category

Every firefighter has the right and obligation to report safety problems and contribute ideas regarding their safety. Supervisors are expected to give these concerns and ideas serious consideration. When an individual feels an assignment is unsafe, they also have the obligation to identify, to the degree possible, safe alternatives for completing that assignment. Turning down an assignment is one possible outcome of managing risk.

- A turn down is a situation where an individual has determined an assignment cannot be undertaken as given, and they are unable to negotiate an alternative solution.
- A turn down must be based on an assessment of risks and the ability of an individual or organization to control those risks.
- A situation may be a candidate for a turndown if:
 - There is a violation of safe work practices.
 - Environmental conditions make the work unsafe.
 - The forces lack the necessary qualifications or experience.
 - Defective equipment is being used.
- The following steps will be used when turning down an assignment:
 - The individual will directly inform their supervisor that they are turning down the assignment as given. (Document using criteria outlined in the risk management process.)
 - Supervisor will notify the Safety Officer immediately upon being informed. In the absence of a Safety Officer, the appropriate Section Chief or Incident Commander will be notified. This step provides accountability for decisions and initiates communication of safety concerns.
 - If the supervisor requests another resource to perform the assignment, he/she is responsible for informing that resource that the assignment has previously been refused and the reason(s) why.
 - The safety hazard should be documented by the submission of a SAFENET or SAFECOM.
- These actions do not stop an operation from being carried out. This protocol is integral to the effective management of risk as it provides timely identification of hazards to the chain of command, raises risk awareness for both leaders and subordinates, and promotes accountability.
